

AUSTRALIAN COMPUTER SOCIETY

Software Development SIG

Australian Computer Society
South Australian Branch

Introduction

- Why this SIG?
 - Arose from discussions between myself (David Benn) and Sorin Buzilla (ACS SA committee members).
 - ACS has an IT PM SIG, a common interest group with AJUG, and in the past, an eCommerce SIG, but...
 - nothing specific to software development except for some special events (eg 'Agility').

Introduction

- Software development is not something you “grow out of”.
 - It's at the heart of IT and computing in general;
 - It's what many of us plan to spend the foreseeable future doing;
 - It's complex, part science, part craft.

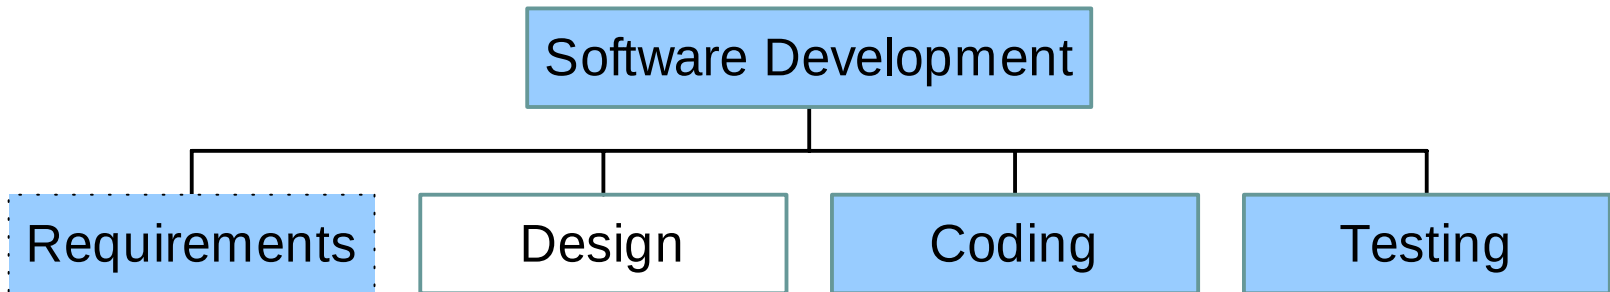

Emphases

- Proposed emphases of this SIG:
 - A forum for practitioners, current or budding;
 - Experience sharing re:
 - tools, techniques, methodologies;
 - What practices can we adopt to make it more likely we will want to work on our own or others' code now and into the future?

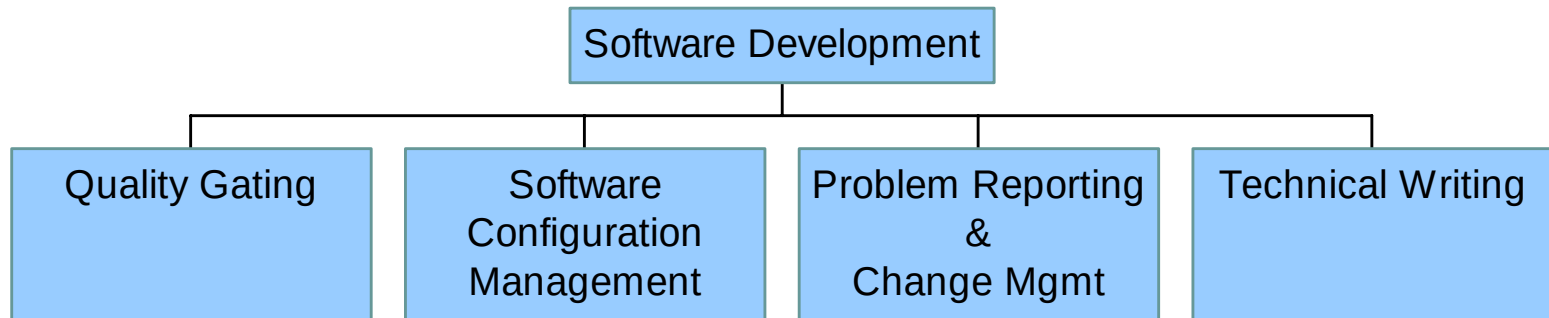

Introduction

- What you do depends upon where you work, but includes some or all of...

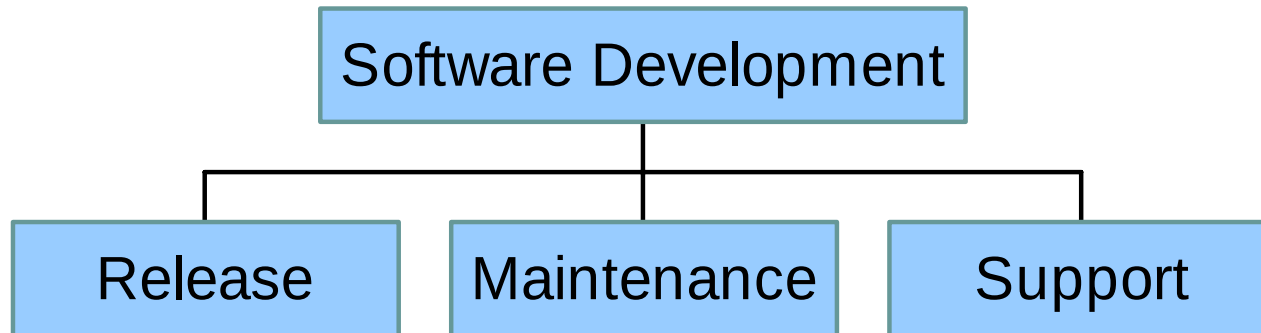

Software Dev Taxonomy

Possible Topics

- A closer look at Agile etc methodologies.
- Testing techniques and tools.
- Patterns & pattern languages.
- Programming paradigms new and old.
- The role of use cases; examples.
- Is Design Dead?
- Habitability and piecemeal growth
 - The quality without a name.

Sources of Speakers

- Members of the Software Dev SIG.
- Local industry practitioners.
- Other ACS branches and contacts.
- External speakers.
- AJUG, SEA, IEEE, ACM etc joint events?

Future Meetings

- Next

- February 2002 at Ngapartji
- Topic & speaker are TBD

- Future

- Every two months, possibly more often.
- Depends upon speakers/convenors.
- Presentations, discussions.

Resources: Printed Journals

- Dr Dobbs Journal
- Software Development Journal
- IBM's Java developer journal
- Microsoft developer journal
- C/C++ Users Journal
- The {C, C++, Java} Report
- etc
